

BLACK BELT WITH Wi-Fi

THE UNNECESSARY SIDE QUEST.

CURIOSITY
COMPILES
PROGRESS

I build AI systems.
Why does nobody ask
how they work?

- EMBEDDINGS
- TOOL ORCHESTRATION
- EVALUATION LOOP
- CONTEXT WINDOWS
- GUARDRAILS
- OBSERVABILITY
- SCALING ... ?

SMALL
PROJECTS
MAKE
BIGGER
PEOPLE.

Maybe give
them a reason
to ask.

TECH
PEOPLE
ARE
PEOPLE
TOO.

Then I need
a ninety-page
proposal!

SIX-MONTH ROADMAP

Or one tiny
side quest.

A silly project can teach
serious tool handoffs.

Finally, a boss fight
with a chorus!

Wait,
how does
that work?

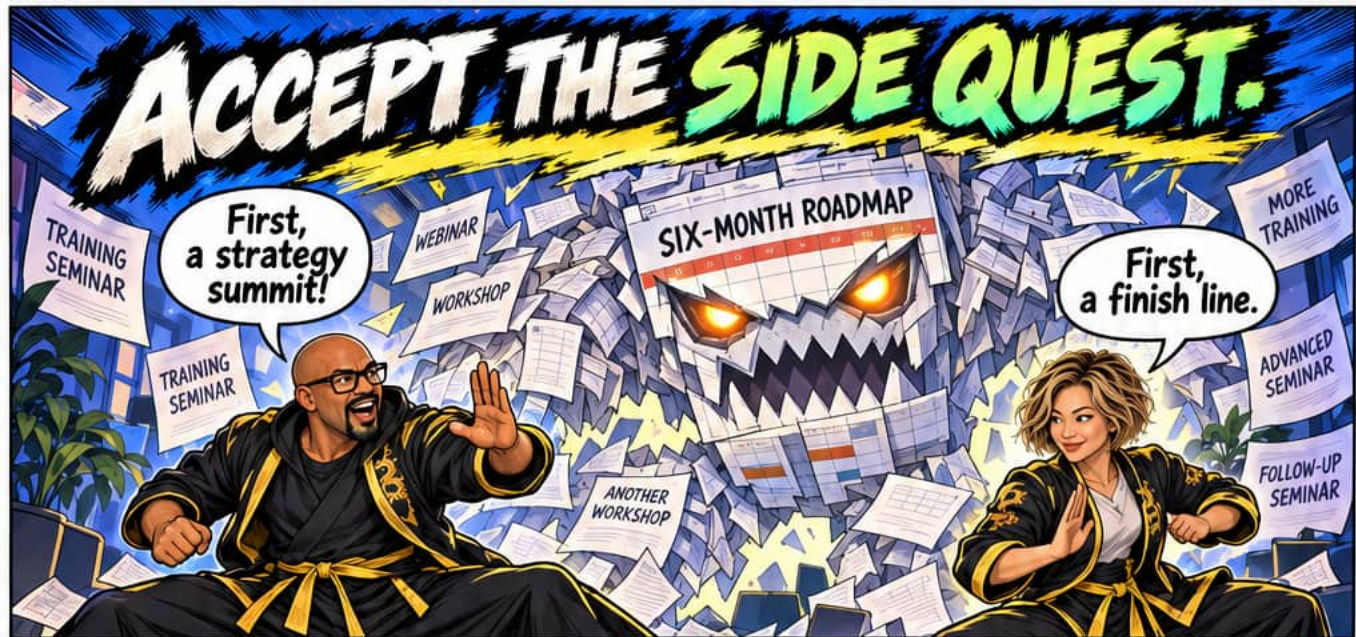

Could you
show an example?

Can we
try it too?

What tool
does that use?
